

Passenger Train Classification

- ✦ Intercity passenger trains
- ✦ Commuter trains
- ✦ Rapid transit
- ✦ Light rail transit systems
- ✦ Monorail trains

Intercity passenger trains

- ☀ Connect major cities, with stops at small towns. Amtrak is an example of this type.

Commuter Trains

☀️ Travel within a metropolitan region.

Rapid Transit

☀ Provide service within and around the edges of cities. Often are subways or elevated. Atlanta's MARTA is an example.

Light rail transit system

- ✦ Modern version of trolley cars on small track. New York's Metrorail is an example.

Monorail trains

- ☀ Suspended from a track or on a single rail. Generally used for short runs such as at airports and amusement parks.
